Chief Complaint

"I want to restart my medications."

HPI

28yo female who is medically admitted for pyelonephritis. Patient reportedly stopped psychiatric medications 6 months ago and wants to restart medications and restart with psychiatrist. Social work has been consulted and provided patient with information for outpatient psychiatry.

Patient reports that she stopped taking her medications 6 months ago due to cost. She had recently lost her job and stopped taking medications due to finances. Patient notes that her mood has been unstable with anxiety and poor sleep. She notes anxiety and sleep were better managed when on medication. She denies recent SI, plan and intent. She denies violent thoughts.

Patient reports she wants to engage as an outpatient with psychiatry and wants to start medication when inpatient.

F#: (605) 606-0402 **P#:** (855) 346 7763
